Ofrecimiento № 574.1

Nombre ofrecimiento: Seminar on Soil & Water Conservation and Dryland Farming for Developing Countries

Información específica: Authorized by Chinese Ministry of Commerce, International Exchange Center of Yangling Agricultural High-tech Industry Demonstration Zone is to host "Seminar on Soil & Water Conservation and Dryland Farming for Developing Countries in 2017" from April 18\textsuperscript{th} to May 10\textsuperscript{th}, 2017 in Yangling, Shaanxi with English as its working language.

The seminar will mainly focus on introduction of China national conditions and Chinese agricultural development, international research progress on soil-water conservation and dryland farming, soil erosion prediction model, dryland nutrient management, water management, measures and technology extension of Chinese water-soil conservation, application of new technology in water-soil conservation, etc.

Seminar programs consist of thematic lectures, field visits and communicative exchange activities. Famous water-soil conservation experts will be invited for lectures and participants will visit research institutions and companies in Yangling and the Shaanxi provincial water-soil conservation ecological environment monitoring center to acquire a clear understanding of Chinese research on water-soil conservation and dryland farming, major measures undertaken, achievements attained and implementation results in water-soil conservation.

Purposes of this seminar includes to train the participants to exchange and discuss their local main problems in water-soil conservation and dryland farming in their own countries based on their lectures and visits in Yangling and neighboring regions, to seek for cooperation initiatives with Chinese research institutions, and to enhance their friendly exchange with other developing countries. Meanwhile, participants to this workshop are expected to apply their acquired water-soil conservation and dryland farming knowledge and practical techniques to promote the technology advancement in this field and contribute to resolving correspondent problems in their respective countries.
